

AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island communities and support economic growth in the Gulf of Fonseca region of El Salvador.

Iniciando con una central hidroeléctrica en el 2009, expandiéndose en el mercado y diversificando sus operaciones en el 2016, con proyectos de energía eólica y solar, lo cual le permite tener actualmente más de 800 MW en toda la región.

The energy sector in El Salvador has experienced significant growth in recent years, positioning the country as a regional leader in the transition to renewable, cleaner, and more sustainable sources.

AES is a global company with 38 years of experience that offers sustainable and affordable energy in the 14 countries where it operates. Thanks to a workforce of more than 9,000 people, it delivers sustainable energy to more than 100 million people throughout the world.

The upcoming projects in El Salvador include the construction of a Biogas Power Generation Plant on the Acelhuate River in San Salvador, the commissioning of a photovoltaic plant at the 15 de Septiembre Hydroelectric Plant, and the establishment of a wind park in Metapán, Santa Ana.

Airtificial specialises in artificial intelligence and robotics, and has had several ventures in the renewable energy segment as an independent power producer (IPP) and builder for third parties. Besides the project in El Salvador, Airtificial built several solar farms in Spain.

El Salvador's solar energy capacity has surged 160-fold from 2015 to 2023, driven by over 60 solar farms, significant investments, and improved technology facilitating growth in renewable energy.
