

Does Albania have a solar PV potential?

Explore the solar photovoltaic (PV) potential across 6 locations in Albania, from Tirana to Vlorë. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

What is the ideal angle to tilt solar PV panels in Albania?

So far based on Solar PV Analysis of 6 locations in Albania, we've discovered that the ideal angle to tilt solar PV panels in Albania varies between 35°; from the horizontal plane facing South in Tirana and 34°; from the horizontal plane facing South in Vlorë.

Is Tirana a good place to install solar panels?

Tirana, Albania, situated at a latitude and longitude of 41.3253 and 19.8184 respectively, is a favorable location for solar photovoltaic (PV) installations due to its varying seasonal average daily solar irradiance per kilowatt of installed capacity. In the summer season, it's as high as 7.85 kWh/day while in autumn it averages at 3.70 kWh/day.

How to optimize solar generation in Tirana?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tirana, Albania as follows: In Summer, set the angle of your panels to 25°; facing South. In Autumn, tilt panels to 45°; facing South for maximum generation.

Is agrisolar a viable solution for a growing rural economy in Albania?

About 20% of Albania GDP relies on agriculture that employs about 60% of the population (as of 2020). Hence, agrisolar (and agrivoltaic) projects are among the most effective solution for a growing rural economy. Karavasta Solar Project - 140 MW | Voltalia's first development in Albania | Voltalia has started doing business in Albania in 2018 ...

What is Voltalia doing in Albania?

Voltalia has started doing business in Albania in 2018 with the unsuccessful participation in the first solar tender organized by the Ministry of Infrastructure and Energy of the Republic of Albania ("MIE"). Despite this result, Voltalia has demonstrated great interest in the construction of 2.5 MW FiT-solar PV projects.

Bluesun 50k W On Grid Solar System in Albania. Project Type: On Grid Solar System. Installation Site: Albania. Installation Date: Sep.1.2022. System Components: 88PCS 560w Monocrystalline Half Cut Solar Panels

Energy Producer and Service provider in renewable energy production from solar, wind, hydro and biomass, also combining storage solutions. As an integrated industrial company, Voltalia developed strong experience

throughout the value chain of a renewable project since the development and financing of projects, EPC and the operation and maintenance.

Explore the solar photovoltaic (PV) potential across 6 locations in Albania, from Tirana to Vlorë. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

Our mission at Nova Solar is to create sustainable and cost-effective energy solutions to help minimize the financial and environmental burden on our communities. Providing the correct and quality service for the installation of photovoltaic plants with maximum efficiency, zeroing your electricity bill in business, home and transport.
