

Is Algeria committed to energy sustainability?

This signifies Algeria's commitment to energy sustainability, resonating with the broader objectives of the AEW: Invest in African Energy. Algeria's state oil company Sonatrach and energy major ExxonMobil have signed a deal to develop two major gas fields in southern Algeria's Ahnet and Gourara basins.

What is Algeria's Energy Transition Plan?

Algeria's energy transition plan consists of three structural components - a new government ministry, a regulatory reform, and a new national renewable energy company. o Ministry of Energy Transition and Renewable Energies (METRE): In June 2020, the government created METRE, the first of two new bodies to manage and carry out the transition plan.

Why is Algeria a good country for energy exports?

Algeria's geographical position near Europe provides an advantage for energy exports, particularly to Mediterranean countries. Aligning with global sustainability goals, the Algerian Ministry of Energy and Mines has set targets for electricity generation, aiming for 40% from renewable sources by 2030.

Does Algeria have a link between gas resources and electricity generation?

The link between gas resources and electricity generation in Algeria underscores the importance of European investments in renewable energy. A reduction in the electricity generated from natural gas would potentially increase the volume of gas exported to Europe.

How much renewable power does Algeria have?

The total renewable power installed capacity in Algeria reached 686 MW in 2020, as part of its national energy portfolio, although the Algerian government has spent tremendous efforts on introducing new sustainable technologies to enable the transition towards a cleaner and sustainable energy system.

Is Algeria a reliable energy ally?

For Algeria, it epitomizes the culmination of six decades of gas sector expertise, cementing its status as a reliable, strategic energy ally. The formulation of a cohesive, long-term policy is essential to ensure a steady gas supply, aligning with both European energy security needs and Algerian interests.

EOT Energy A/S were founded in 1982 and is part of ESTOOL 2000 HOLDING A/S. EOT Energy have gained a firm foothold within the onshore/offshore oil, gas and power generation markets.
