

Will Angola produce green hydrogen?

Angolan state-owned oil company, Sonangol, has announced plans to produce green hydrogen as part of Angola's energy transition strategy.

Why is Sonangol launching a green hydrogen plant in Angola?

"The initiative is part of the company's energy transition strategy, in the search for renewable energy resources developed in participation with the German companies Conjuncta GmbH and Grauff GmbH & Co. Engineering KG, which signed an agreement to implement a factory to produce green hydrogen in Angola," Sonangol said in a statement.

Who is the National Oil Company of Angola?

Sociedade Nacional de Combustíveis de Angola, Empresa Pública, Sonangol, E.P., founded in 1976, is the Angola's national oil company, responsible for exploring, producing, refining, transportation, storage and marketing of hydrocarbons.

What are oil and gas companies in Angola?

The oil and gas companies in Angola are involved in all stages of the petroleum industry worldwide, but of course mostly in the West of Africa. They search for and produce petroleum, they transport, refine and market petroleum and petroleum products. They are therefore called integrated companies.

What can Angola do for the world?

By leveraging Angola's abundant zero-emissions energy resources, we plan to supply vital green hydrogen and ammonia to the world, helping to meet critical gateways for industrial decarbonization strategies and targets in Europe and elsewhere.

Could Angola be a new hub for sustainable industrialization in Africa?

With the global push to scale-up green hydrogen production to meet targets required for achieving net zero emissions by 2050, this project has the potential to not only accelerate the clean energy transition, but also to establish Angola as a new hub for sustainable industrialization in Africa.

This project is particularly notable as it positions Angola to play a crucial role in the global energy transition by becoming a key supplier of green hydrogen and ammonia, essential for industrial decarbonization efforts in Europe and other markets. Sonangol, Angola's state-owned oil company, sees this partnership as a cornerstone of its ...

Angola's landmark green hydrogen project will begin producing and exporting green hydrogen to Germany in 2024, making the project the first of its kind in Africa to supply Europe with the resource. Powered by

hydroelectricity, the 400 MW project is being developed by national oil company Sonangol alongside German firms Gauff and Conjuncta.

By leveraging Angola's abundant zero-emissions energy resources, we plan to supply vital green hydrogen and ammonia to the world, helping to meet critical gateways for industrial decarbonization strategies and ...

Sonangol, Angola's state-owned energy company, announced last June that it had inked an agreement with two German companies, Conjuncta and Gauff Engineering, to build a green hydrogen plant along the country's Atlantic coast. The plant is projected to be operational by 2024, making Angola the first African country to export hydrogen.

Meanwhile, the EU has put in place the Africa-EU Green Energy Initiative which aims to support Angola's decarbonization efforts as part of the cooperation program Global Europe 2021 ...

This project is particularly notable as it positions Angola to play a crucial role in the global energy transition by becoming a key supplier of green hydrogen and ammonia, essential for industrial decarbonization efforts in ...

Meanwhile, the EU has put in place the Africa-EU Green Energy Initiative which aims to support Angola's decarbonization efforts as part of the cooperation program Global Europe 2021-2027. Through the initiative, the EU is mobilizing funding and technical assistance from a variety of international financial organizations such as the European ...

Angola is set to become Germany's first supplier of green hydrogen from renewable energy after its state-owned energy company Sonangol signed a letter of intent to build a factory with...

Forming part of Angola's energy transition and diversification strategy, Sonangol signed a preliminary agreement in 2021 with German engineering companies, Conjuncta GmbH and Gauff GmbH & Co Engineering Kg, for the implementation of a factory to ...

By leveraging Angola's abundant zero-emissions energy resources, we plan to supply vital green hydrogen and ammonia to the world, helping to meet critical gateways for industrial decarbonization strategies and targets in Europe and elsewhere.

RENEWABLES-BASED EXPORTS: Riding on its increase in power generation capacity, Angola also plans on becoming an exporter of hydrogen to Europe. The nation's state-owned energy company Sonangol is teaming up with German engineering company Gauff and investment entity Conjuncta to produce green hydrogen at the country's newly installed Laúca ...

The Angolan official appealed to the state-owned oil company Sonangol and its partners to comply with their

promise in a way that the first export of green hydrogen to Germany can take place in 2024. About the cooperation between Angola and Germany, Diamantino Azevedo underlined that "the Angolan Government did not come looking for help.
