

What are the major energy projects in Angola?

These include the Agogo Full Field and PAJ oil projects in Blocks 15/06 and 31 respectively, and the New Gas Consortium (NGC), the first non-associated gas project in the country, which will support the energy needs of Angola's growing economy and strengthen its role as a global LNG exporter.

Who is Angola's largest oil & gas producer?

Azule Energy is now Angola's largest independent equity producer of oil and gas, holding 2 billion barrels equivalent of net resources and growing to about 250,000 barrels equivalent a day (boe/d) of equity oil and gas production over the next 5 years.

Why did BP Angola join Azule energy?

All BP Angola and Eni Angola staff have joined Azule Energy. Eni and BP share common goals for Azule Energy in achieving environmental and sustainability ambitions. They believe that combining their efforts will create more efficient operations and offer the potential for increased investment, job creation and growth in Angola.

What is NGC & how does it work in Angola?

A first for Angola. Historically, gas has been captured as a by-product of oil extraction (associated gas). The NGC is different in that it specifically targets to develop and produce non-associated gas located in the offshore gas fields to supply Angola LNG, thereby enhancing the nation's gas export capability.

What will Azule energy do for Angola?

Combining two world-class businesses into one stronger team, Azule Energy will leverage synergies and high-quality assets, boosting activities in Angola and will have one of the largest portfolios of production, development and exploration opportunities in Sub-Saharan Africa.

Who will be Angola's largest producer?

It is expected to be Angola's largest producer, holding stakes in 16 licences, as well as participating in the Angola LNG joint venture. Azule Energy will also take over Eni's stake in Solenova, a solar company jointly held with Sonangol.
