

What kind of energy does Haiti use?

This page is part of Global Energy Monitor 's Latin America Energy Portal. Haiti relies on a mix of imported oil and domestic biofuelssuch as wood and sugar cane for its total energy supply. As of 2020,more than 90% of electrical generation in Haiti was derived from fossil fuels and less than 10% from renewables.

How does oil affect electricity in Haiti?

Like many island nations,Haiti is highly dependent on imported fossil fuels for electric generation--roughly 85% of its electricity is produced from the combustion of petroleum-based fuels. This leaves the country vulnerable to global oil price fluctuations,which directly impact the cost of electricity.

Will USAID and NREL reshape Haiti's energy landscape?

In a bid to reshape Haiti's energy landscape, USAID and NREL will support Haiti's ministries and government in formulating the country's Integrated Resource and Resilience plan, which is a comprehensive energy sector master plan that envisions a sustainable, secure, and resilient energy future for Haiti.

How much power does Haiti have reliably?

Haiti has an installed capacity of 250 to 400 Megawatts (MW) but only 60 percent of it is reliable. Many generation units and grid elements need rehabilitation and repair work. The distribution network has not been rehabilitated for more than 40 years.

Does Haiti produce coal?

While Haiti does not produce,consume,or import coal,the country uses extensive amounts of charcoal (often referred to as coal) for household activities. Haiti does not produce,export,import,or have proven reserves of crude oil or natural gas,nor does it produce refined petroleum products.
