

What is an Infinite Power Box?

Each cell in the system contains an Infinite Power Box within an internal casing, which is similar to the black box recorder of an airplane. For added protection, we concrete-encase the structure during the installation process. The concrete-encased Infinite Power Box is then housed in a secured outer unit, akin to a shipping container.

Is Infinity Solar a good company?

Infinity Solar are very good to deal with, Energy Australia & SP AUS NET are not so good to deal with still waiting for grid connection after nearly 4 months wait. All German made system at a good price. This supplier did more than just whack the system in and clear off. They tailored what we needed.

Why do you use Infinity Solar?

The main reason I am using Infinity Solar is due to the site inspection, and their helpfulness. A very close second was Energy Aware, as they helped with the local Power Company. Original ratings 8 months later we asked Geoff: "Are you happy with the performance of your system so far?"

Will a new coal-fired power station ever be built in Australia?

The declining cost of renewable energy sources, such as solar power, wind power and battery storage, means it is unlikely a new coal-fired power station will ever be built in Australia. The Liddell Power Station is the latest major coal-fired power station to be decommissioned, which took place on 28 April 2023.

Are Australia's coal-fired power stations aging?

Australia's fleet of coal-fired power stations are aging and many are due for decommissioning, and are being replaced by a combination of mostly renewable energy. In early 2017, 75% of the coal-fired power stations in the country were operating beyond their original design life.

Does Australia use coal or oil to generate electricity?

The Australian Capital Territory does not use coal or oil to generate electricity. The Kingston Powerhouse being the last coal-fired power station in the territory, which was decommissioned in 1957. The Northern Territory relies predominantly on natural gas, as well as various renewable energy sources.
