

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

Does Paraguay need to expand its power system?

Also, we estimated the annual revenues for the government of Paraguay and Itaipu through its electricity exports to Brazil. We find that Paraguay needs to expand the capacity of its power system, mainly by investing in hydropower plants, to cover its future electricity needs and sustain national electricity export levels.

What is the electricity system of Paraguay?

The electricity system of Paraguay is mainly powered by two binational (Itaipu, Yacyretá) and one national (Rio Acaray) hydropower plant. The Parana River, located in the Southeastern area of the country, is responsible for most of this hydroelectric generation potential.

How much electricity does Paraguay need in 2040?

The electricity needs of Paraguay increase from 12.42 TWh in 2018 to 24.40 TWh in 2040. Thus, the existing capacity of the country's energy system increases from 8.84 GW in 2018, to 11.5 GW in 2026 and 11.65 GW in 2040 to cover the local electricity demand and export the excess electricity.

Does Paraguay have a hydropower surplus?

Despite Paraguay having an available hydroelectric surplus and an estimated hydropower potential of 56 GW, the western region of Paraguay often has difficulty in accessing electricity due to the geographical location of the electricity generating plants in this part of the country [32].

How important is Itaipu electricity to the Paraguayan electricity market?

The participation of Itaipu electricity in the Paraguayan market has been increased from 73% in 2012 to almost 90% in 2019. This gradual increase emphasizes the importance of Itaipu's electricity supply to the Paraguayan electricity market.

En un nuevo episodio de "¿Qué pasa en Latinoamérica?", el podcast del International Gas & Energy Forum (IGEF), Mauricio Bejarano Martínez, viceministro de Energía y Minas, compartió la visión y estrategia de Paraguay para posicionarse como un hub energético en la región. ...
