

What is the Barbados national energy policy (BNEP)?

This Barbados National Energy Policy (BNEP) document is designed to achieve the 100% renewable energy and carbon neutral island- state transformational goals by 2030. These include: Provision of reliable, safe, affordable, sustainable, modern and climate friendly energy services to all residents and visitors.

Does Barbados need a BNEP?

The BNEP provides a basis for building on these successes while seeking to expand the use of these and other renewable energy technologies such as wind and biofuels. However, even as Barbados promotes the development of renewable energy, there are ongoing plans to explore for fossil fuel resources offshore.

Why should Barbados invest in the energy sector?

The energy sector in Barbados should be invested in to foster development, promote energy security, reliability, affordability, and establish and maintain a sustainable sector. This can be achieved through innovation and workable partnerships which promote a strong economy and a healthy environment.

Should Barbados invest in fossil fuels offshore?

However, even as Barbados promotes the development of renewable energy, there are ongoing plans to explore for fossil fuel resources offshore. This patrimony will be pursued aggressively with the view to maximise foreign exchange gains from the export of any exploited hydrocarbons.

Why is solar water heating so popular in Barbados?

Indeed, the success of the solar water heating industry is a source of pride for the country, the recent development of the local solar photovoltaic (PV) industry and the burgeoning electric vehicle market in Barbados are also encouraging.

What will Barbados spend on sewage treatment plant upgrades?

Under the innovative deal, led by the Canadian Imperial Bank of Commerce, Barbados replaced some of its most expensive sovereign debt with a lower cost loan. The result is around \$125 million that Barbados will spend towards sewage treatment plant upgrades to boost water supplies and reduce the amount of pollution going into the Caribbean.

3.5K. Target of building 10 000 homes in five years under the Home Ownership Providing Energy (HOPE) project. Additional 2 561 housing solutions to be created in St. Philip and St. Lucy through a National Housing Corporation-private sector joint venture separate from HOPE
