

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

Does Benin have a good energy sector?

This paper analyzed the energy sector in the Republic of Benin, a developing country in West Africa that has many problems in meeting the needs of its population for almost all sectors over the last decade, specifically, between 2010 and 2018, in terms of production, consumption, and imports.

Does Benin have a green energy potential?

Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years. The country has a huge undeveloped renewable-energy (RE) potential that can contribute considerably to its national energy production capacity. This paper summarizes the current RE situation in Benin and examines its future prospects.

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

Which renewable resources are available in Benin?

Of all the available renewable resources in Benin, solar has the greatest potential, and is the easiest to implement for solving problems in the Republic of Benin.
