

Those advances have allowed us to establish a state-of-the-art US facility in Pittsburgh. Our medium-sized company remains privately owned. This business structure gives us the flexibility and reliability we need to offer a full range of electron beam (E-Beam) radiation sterilization services and related capabilities.

1?????:94101-94 94114-94147? 2 ???(San Francisco),?"????"?????",????????????????,???????? ...

using the raster package and the geom() function you can extract the raw coordinates from the RDS object, as well as which island/state the coordinate is part of and whether it is solid or a hole. In your case: geom(us0) Then it's just a matter of finding out which vertices belong to which islands. A quick way of deleting B would be to delete everything with ...
