

What is Bolivia's energy mix?

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. In 2021, Bolivia's national electricity agency ENDE announced its intention to generate up to 80% of the country's power from renewable sources by 2025.

What type of energy system does Bolivia use?

Similar to the country's total energy system, the power sector relies heavily on natural gas (AETN, 2016). The electricity network in Bolivia is broken into two classifications: the National Interconnected System (SIN) and the Isolated Systems (SAs).

What percentage of Bolivia's electricity comes from renewables?

A quarter of the electricity generated in Bolivia comes from renewables. On the other hand, 12% of the population still does not have access to electricity. The government has launched the Bolivia Electric Plan 2020-2025 to support the expansion of the el

Does Bolivia have a long-term energy plan?

As previously mentioned, the Bolivian government does not provide any long-term energy planning study, however, the UNFCCC (2015b) states that RE will compose 81% of electricity generation by 2030. Bolivia's scenario for 2027 according to MHE (2009) states that biomass sources will comprise 8% of total final energy demand.

Does Bolivia support democratic development aligned with EU values?

Nevertheless, there's a continued commitment to support Bolivia's democratic development aligned with EU values. Under the Global Gateway Investment Agenda, Bolivia's two priority areas are critical raw materials, particularly green lithium, and renewable energy.

How does the EU deal with Bolivia?

With nearly 40% of its population living below the poverty line, Bolivia faces significant wealth distribution inequalities and a strong informal sector. EU relations with Bolivia are not formalised, although trade relations are guided by the Generalised Scheme of Preferences.

Thanks to its enormous financial reserves generated during good times, Bolivia managed to hold off the day of reckoning for a few years but, buffeted further by COVID-19, the economic miracle...

Bolivia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version
Since energy is such a large contributor to CO₂, reducing energy consumption can inevitably help to reduce emissions.

Introduction. Bolivia, with a population of almost 11 million inhabitants, is considered one of the poorest countries in Latin America. While urban areas such as La Paz and Santa Cruz are modern cities with a relatively good supply of modern energy services, the majority of Bolivia's rural areas are still experiencing a lack of most basic services, including reliable and affordable ...
