

Where can I get solar panels in New York?

You can get almost any panel you like from Momentum Solar, including panels from companies like QCells, REC, and Silfab, to name just a few. Having the freedom to customize your system is a big plus in New York since the cost of solar equipment is so high in the state.

Who are the best solar companies in New York?

But don't stress. We've got the latest research, data and unfiltered reviews of the top New York solar installers, comparing equipment, services, financing and warranties to help you decide. The best solar companies in New York are Sunpower and Tesla based on our data comparing 26 different national companies.

How do I find a solar installer in New York?

A unique challenge of finding a solar installer in New York is that most solar companies only have locations in and around New York City. Availability is extremely important for people who don't live in the city or on Long Island. Tesla scores well in this category, with more locations spread throughout the state than any other installer.

Is New York a good state for solar energy?

Whether you're building a new construction home in Long Island or remodeling a mountain cabin in the Catskills Mountains, New York's high electricity rates, abundant tax incentives and 234 days of partial sun make it one of the top 10 solar energy states.

How big should a solar system be in New York?

Buy an appropriately sized system: Many people are surprised to hear that the average solar panel system size in New York is just 6.5 kilowatts (kW). The national average system size is 9 kW, but New Yorkers use significantly less energy than the residents of most other states.

How much does solar cost in New York?

Going solar in New York is more expensive than it is in most states, at least on a cost-per-watt basis. The average cost per watt for an average-sized solar system in New York is \$2.95, while the national average is just \$2.66 per watt.
