

Who produces electricity in Bolivia?

The electricity sector in Bolivia is dominated by the state-owned ENDE Corporation (Empresa Nacional de Electricidad), although the private Bolivian Power Company (Compañía Boliviana de Energía; CEB) is also a major producer of electricity.

What type of energy system does Bolivia use?

Similar to the country's total energy system, the power sector relies heavily on natural gas (AEN, 2016). The electricity network in Bolivia is broken into two classifications: the National Interconnected System (SIN) and the Isolated Systems (SAs).

Does the World Bank support the electricity sector in Bolivia?

External assistance to the electricity sector in Bolivia is heavily focused on rural electrification with no funding for large-scale generation, which has been fully privatized. Currently, the World Bank is involved in two projects in the energy sector in Bolivia:

Is biomass a source of electricity in Bolivia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bolivia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

What are the policy guidelines for the energy sector in Bolivia?

The Bolivian government has established the following policy guidelines for the energy sector: energy sovereignty, energy security, energy universalization, energy efficiency, industrialization, energy integration, and strengthening of the energy sector (MHE, 2014).

Can Bolivia achieve universal access to electricity by 2025?

Bolivia is moving forward with its objective of reducing poverty and achieving universal access to electricity by 2025. Between 2014 and 2019, 4,300 households were connected to the power grid, providing electricity to approximately 20,200 people. In addition, the country constructed 708 kilometers of electricity distribution lines. Challenge
