

Which power stations are located in Botswana?

Botswana is home to several power stations, including Morupule Power Stations B (600 MW) and A (132 MW), Orapa Power Station (90 MW), and Phakalane Power Station (1.3 MW).

Does Botswana have a good electricity supply?

According to Statistics Botswana, local electricity generation and distribution has showed a slight improvement, increasing by 10.2 percent from 807,943 MWh during the fourth quarter of 2022 to 890,655 MWh during the first quarter of 2023. The increase was attributable to the performance improvement of Morupule A and B power stations.

What is the storage capacity of strategic reserves in Botswana?

Botswana's strategic reserves storage is also not yet up to international standard; storage capacity is approximately 18 days compared to the international standard strategic storage capacity of 90 days. Commercial buffer stock stands at less than five days of national consumption compared to the international standard of 14 days cover.

Jindal Energy beat Minergy Limited and Sese Power to win a bid to build a 300 Megawatt coal power generation station and sell power to state owned Botswana Power Corporation, government announced November last year.

According to the BPC Annual Report, 2010, the generation of electricity in Botswana started in 1985 with a coal-fired thermal power station at Morupule operating at a capacity of 132 MWh. Before this period, most of Botswana's electricity was imported from South Africa's power utility, Eskom.

The research determined the public and work-related exposure to natural radiation from Morupule Coal Power Station in Botswana. Concentrations of natural radionuclide concentrations were ...
