

Renalfa IPP owns renewable energy generating facilities with an overall capacity of over 450 MW in Bulgaria, Hungary, the Republic of North Macedonia and Romania. An additional more than 1 GW are in an advanced stage of development and construction.

6 ???&#0183; The grant scheme, funded under the National Recovery and Resilience Plan, provides a little over 1.15 billion leva to support the construction and commissioning of renewable ...

To support Bulgaria's transition to a more sustainable and diversified energy mix, IFC is financing a 225-megawatt (MW) direct current solar photovoltaic (PV) project developed by Rezolv Energy, a leading independent renewable energy producer in Central and Eastern Europe.

Bulgaria launched in mid 2019 its Renewable Energy, Energy Efficiency and Energy Security Program, with an estimated EUR 33 million budget to finance street lighting, geothermal and hydropower utilization, energy efficiency in ...

Bulgaria on Wednesday launched a long-delayed tender for at least 3,000 MWh of new energy storage capacity as part of its efforts to increase the share of renewable energy sources, particularly wind and solar, in the country's energy mix.

The Tenevo plant will add 238 MW of solar generation capacity to the Bulgarian national energy system, with a long-term plan to add on a 250MW capacity of behind-the-meter energy storage. This is an important project to advance towards Bulgaria's ...

6 ???&#0183; The grant scheme, funded under the National Recovery and Resilience Plan, provides a little over 1.15 billion leva to support the construction and commissioning of renewable energy storage facilities with at least 3,000 MWh of usable capacity, connected to Bulgaria's power transmission and distribution systems, the ministry said in a statement over the weekend.

4 ???&#0183; The realisation of the Tsenovo Solar Park marks a significant milestone for Enery, demonstrating the company's commitment to a sustainable energy future for Bulgaria and Central and Eastern Europe. Through long-term green power purchase agreements, and the integration of eco-friendly practices, Enery not only delivers clean energy but also ...

The Tenevo plant will add 238 MW of solar generation capacity to the Bulgarian national energy system, with a long-term plan to add on a 250MW capacity of behind-the-meter energy storage. This is an important project to advance towards Bulgaria's ambitious net-zero greenhouse gas emissions target by 2050 and reduce

reliance on coal generation ...

A Bulgarian tender for the construction of at least 3,000 MWh of energy storage systems has attracted 151 proposals worth a total of almost BGN 5 billion (EUR 2.56bn/USD 2.7bn), the country's energy ministry said on Friday.

Renalfa IPP owns renewable energy generating facilities with an overall capacity of over 450 MW in Bulgaria, Hungary, the Republic of North Macedonia and Romania. An additional more than 1 GW are in an advanced ...

Bulgaria launched in mid 2019 its Renewable Energy, Energy Efficiency and Energy Security Program, with an estimated EUR 33 million budget to finance street lighting, geothermal and hydropower utilization, energy efficiency in buildings, and other projects.

4 ???&#0183; The realisation of the Tsenovo Solar Park marks a significant milestone for Enery, demonstrating the company's commitment to a sustainable energy future for Bulgaria and ...

The winning schemes, valued at nearly BGN 107 million, will enable the construction of 435 MW of renewable power plants and battery energy storage systems (BESS) of 176 MW. The 67 projects that could not qualify in this funding round will be included in a waitlist with proposals worth more than BGN 44 million, the Energy Ministry said.

To support Bulgaria's transition to a more sustainable and diversified energy mix, IFC is financing a 225-megawatt (MW) direct current solar photovoltaic (PV) project developed by Rezolv Energy, a leading independent ...
