

How much money is needed for energy storage projects in Bulgaria?

The Ministry of Energy of Bulgaria prepared EUR 589 million in grants for standalone energy storage projects. The deadline for applications is November 21. With the surge in photovoltaic capacity, ambitious plans for renewables overall and a collapse in the coal power segment, Bulgaria needs urgent grid upgrades alongside energy storage.

Is Bulgaria planning a new energy storage facility?

Bulgaria is developing a plan for another two large facilities of the kind. The Ministry of Energy acknowledged that it is issuing the public call for standalone energy storage units after a long delay.

Why do we need energy storage solutions in Bulgaria?

Establish a reliable energy system with greater share of intermittent generation. In the context of Bulgaria's energy landscape, energy storage solutions present a diverse array of benefits to various stakeholders stemming from its unique ability to time-shift energy and rapidly respond when called upon. The applic

What challenges will Bulgaria face on its energy transition?

Get a glimpse of the new challenges Bulgaria will face on its energy transition. In May 2023, Bulgaria was for the first time in a decade a net importer of electricity². The reason for this was not a lack of generating capacity, but instead the natural logic of power markets seeking the

Is a peaking plant a viable alternative for Bulgaria's peaking capacity needs?

Effective and fast-responding alternative for Bulgaria's peaking capacity needs. With limited natural gas reserves and uncertain costs for imported energy, storage can provide a reliable source of power during peak demand periods on the Bulgarian grid. Compared to traditional peaking plants

Who can benefit from a high imbalance in Bulgaria?

the market after grid services than standalone solar **BALANCING AND PORTFOLIO OPTIMISATION** Considering the high imbalance⁶ changes seen in Bulgaria, Balance Responsible Parties (BRPs) such as utilities, traders, and IPPs as well as DSOs can also benefit from

Bulgaria's battery storage market gears up Bulgaria has installed between 40 MWh and 50 MWh battery energy storage capacity to date. However, a new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility could see the country install another 1 GWh over the next two years.

The bundle of interconnected legislative proposals aims to align climate, energy and transport policies with the targets agreed in the European Climate Law, translating climate goals into concrete actions. ³ Stanchev (2023) "Angelina Tsacheva, ESO: Bulgaria should also connect its network with Western Europe", Capital Bulgaria, 21

March ...

A 25MW/55MWh battery energy storage system (BESS) has been commissioned in Bulgaria, Eastern Europe, by operator Renalfa IPP, using technology provided by Chinese firms Hithium and Kehua. The project is co-located with a 33MWp PV plant in southwestern Bulgarian city of Razlog and is connected to the transmission system operator ...

The EU initially granted Bulgaria grant funding of around US\$6.6 billion (EUR6.2 billion), which was later lowered to around US\$6.1 billion (EUR5.7 billion), and 57.5% of this money was earmarked for investments into Bulgaria's green transition. ... A roundup of energy storage news from across the EU, involving Polar Night Energy's "Sand ...

A roundup of energy storage news from across the EU, involving Polar Night Energy's "Sand Battery" in Finland, GazelEnergie and Q Energy in France, and Spain's MITECO awarding financial support to 45 projects. ... The deadline has now passed for Bulgaria's EU-backed support scheme for standalone energy storage, and the bids submitted ...

The storage areas have always been in good condition, fully meeting the current standards in the Republic of Bulgaria for storage of cereals. Grainstore has warehouses for storage of grain and other raw materials with a capacity of about 350,000 tons. and well-trained staff, which is a prerequisite for quality customer service.

How can Different Energy Storage Applications Benefit Bulgaria? Energy storage applications play a vital role in the successful integration of renewable energy sources into electricity grid. They ...

EU countries were required to attempt to fill 85% of total EU underground gas storage capacity in 2022 and to fill 90% of Europe's gas storage capacity by 1 November 2023. Those targets were not only met but they were surpassed. By November 2022, an EU-wide average storage level of 94.9% was achieved.

CAF Carbon Capture & Storage in Bulgaria 1 Carbon Capture and Storage: Safeguarding Jobs while Reducing Emissions Bulgaria has committed to fulfilling its role in achieving the EU's targets for reducing GHG emissions by 55% by 2030 and achieving carbon neutrality by 2050. Bulgaria needs to take substantial actions across its economy to reduce

Bulgaria earmarked EUR 589 million for the endeavor, funded under the European Union's Recovery and Resilience Facility. The Ministry of Energy in Sofia plans to launch a tender on September 2 for standalone ...

The National Recovery and Resilience Plan of Bulgaria envisages the construction of national storage infrastructure with 6000 MWh storage capacity worth EUR 800 million wholly financed from the Recovery and Resilience Facility. Guarantees of origin exchange. The third amendment is the introduction of a guarantees of origin exchange market.

The BESS tender is part of Bulgaria's RESTORE Project, which aims to provide funding for constructing and putting into operation at least 3000 MWh in battery storage capacity to enhance the ...

The ministry released a statement a day prior to the application window's opening. Energy minister Vladimir Malinov said the investments, worth up to BGN1,153,939,700 (US\$657.4 million) "will guarantee the security and stability of the Bulgarian electricity system." Tender bids must be submitted electronically, with more information available on this portal. ...

Since then, along with the funds for Bulgaria's RESTORE scheme, the EU has approved state aid and incentive schemes to support energy storage in various other countries. They include a EUR350 million scheme in Spain, grants worth EUR150 million in Slovenia and a EUR1.1 billion Hungarian government state aid plan to support large-scale energy ...

The Bulgarian Ministry of Energy is readying to launch a tender on September 2 and provide Capex support for the construction and commissioning of 3 GWh of standalone energy storage facilities.

The deadline has now passed for Bulgaria's EU-backed support scheme for standalone energy storage, and the bids submitted amount to four times the available capital available. Some 151 project bids for support were submitted for the scheme, which will provide up to 1.154 billion BGN (EUR590 million/US\$540 million) for up to 50% of the ...
