

What is the energy mix in Burkina Faso?

In 2019, Burkina Faso's energy mix was dominated by biofuels and wastes, with oil products accounting for one-third of the total energy supply. In 2020, 11% of the population had access to clean cooking and only 21% had access to electricity, making Burkina Faso one of the world's least-electrified countries.

Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

How much solar energy does Burkina Faso have?

Early solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m² for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an

Is Burkina Faso suitable for solar power projects?

This suitability assessment was carried out at the request of the Government of Burkina Faso to map potential areas for utility-scale solar photovoltaic (PV) and wind projects. Currently, less than 25% of the population has access to electricity and the majority of those with access live in urban areas.

Which energy source is not included in Burkina Faso?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Burkina Faso: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.

Is biomass a source of electricity in Burkina Faso?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Burkina Faso: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
