

Why is Burundi launching a power generation master plan?

The project aims to support the development of a power generation master plan expected to highlight the various renewable energy options for Burundi in the 'power generation segment', paving the way for strong private sector participation which is critical for meeting the massive challenges of the power sector in the country.

How much power does Burundi have?

Furthermore, Burundi has only 39 MW of installed capacity, of which 95% is hydropower-based, and significant renewable energy potential still to be tapped.

Does Burundi have electricity?

Burundi's access to electricity (6%) is one of the lowest in Sub-Saharan Africa, even though the country's cost of generation (0.062 USD/kWh) is considered relatively low as compared to its neighboring countries.

Is poor quality power service undermining economic growth in Burundi?

Poor-quality power service is undermining opportunities for economic growth in Burundi and the lack of investments has compromised access to expansion efforts.

What is the ascent Burundi project?

The ASCENT Burundi Project will support the Government of Burundi's (GoB) Universal Access Program, launched in 2023 and will reinforce the medium voltage network across the country while rehabilitating, modernizing, and expanding Bujumbura's distribution network.

Why is Burundi's economic growth stalling?

WASHINGTON, January 10, 2024 -- Although Burundi's economic growth is steadily improving, efforts risks stalling due to lack of access to electricity which affects households, industries, and commercial premises.

This event has been a powerful catalyst for bringing sustainable and accessible energy solutions to Burundi, aligning perfectly with our mission to drive the global off-grid solar ...

WASHINGTON, June 26, 2024 -- A new World Bank-financed project will support the increase of electricity access in Burundi and help to improve the country's energy sector performance. The project is expected to benefit an estimated 2.4 million people, 1,200 public institutions, and 6,000 small- and medium-sized enterprises and industries with ...

Burundi, where about 10% of the population has access to electricity, will see the expansion of its power-distribution grid from next year, boosted by \$1.4 billion of funding from international...

President Ndashimiye of Burundi announces the intention to double the country's solar capacity during the ribbon-cutting ceremony for Burundi's first solar field. Explore the significance of this commitment to renewable energy expansion and its implications for Burundi's sustainable development.

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected 7.5MW solar power plant, located in Mubuga, became operational in 2021.

With 189 member countries, staff from more than 170 countries, and offices in over 130 locations, the World Bank Group is a unique global partnership: five institutions working for sustainable solutions that reduce poverty and build shared prosperity in developing countries.
