Who is cellcube energy storage system?

Correct, CellCube Energy Storage System Inc. is a vertically integrated energy storage system provider. We are in the process of setting up the vanadium mine to produce all-vanadium electrolyte for the use in CELLCUBE flow batteries, exclusively.

What is a cellcube used for?

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid applications and for microgrid power supply in regions without a stable power grid.

Why should you choose a cellcube?

Based on the vanadium redox flow technology, the CellCube allows for a clean, emission-free and fast energy supply at all times. A stable power supply, in combination with renewable energy sources, is ensured at all times and in every climate zone. The use of vanadium electrolytes increases the safety and battery life.

When did cellcube start selling ESS systems?

We started selling our CELLCUBE branded ESS systems in 2008 and while the first years (until around 2010/11) the main customer focus was on technology proof and application specific demo/pilot projects we have around 30% of the installed base in early adopter but commercial use.
