1. Solar energy is cheap and getting even cheaper. Solar PV prices have dropped a whopping 99.6 percent since 1975, down to as little as 11 cents per kilowatt-hour in 2023 for residential uses, as little as 2.5 cents or lower for utility-scale installations.

We look for solar companies with owners who understand that when they sell you a solar system, you expect them to be there for the next 25 years to fix any issues that may arise. Here are the top companies we recommend for solar in California: Best solar installers in California. Best solar companies for home battery installations in California

That said, the cheapest solar company isn't always the best solar company, which is why solar financing options are crucial. If you had a great experience with a solar company but can't afford to pay them \$35,000 for their system this year, see if they'll be willing to work on different financing options.
