

Is Wartsila a Bess integrator?

Wartsila is headquartered in Helsinki, Finland, and primarily provides power solutions in the energy and marine industries. It was the fourth-largest BESS integrator in IHS Markit's 2021 rankings, after Tesla, NextEra and Fluence (in ascending order).

What's new at Wartsila?

This marks the company's first commercial deployment of its latest 'Quantum High Energy' next-generation battery energy storage system (BESS). Wartsila has introduced its latest fully-integrated, high-capacity BESS product 'Quantum2' designed and optimized for global large-scale deployment.

Does Wartsila have a battery energy storage system?

Wartsila Energy has launched its newest battery energy storage system (BESS) solution for utility-scale applications.

Who is Wartsila energy?

Wartsila Energy leads the transition towards a 100% renewable energy future. We help our customers unlock the value of the energy transition by optimising their energy systems and future-proofing their assets.

What makes Wartsila a sustainable brand?

Additionally, Wartsila has also taken a more sustainability-focused approach to the design, ensuring that the housing is low-weight and uses a cooling system with a low global warming potential. The BESS solution also includes standard features such as a US-designed and engineered battery management system (BMS).

What is Wartsila quantum 2 Bess?

Earlier this year, Wartsila announced its Quantum 2 BESS, which, with its containerized design, also offers the convenience of shipping and transport. The 20-foot container shell conforms to the ISO standard and makes it simpler to ship the storage system anywhere in the world while also facilitating simpler on-road transport.

A new generation of grid-level battery energy storage systems (BESS) developed by Finnish company Wartsila is smarter, safer, and more sustainable than its predecessors, the company said in a ...

Battery storage solutions developer Wartsila has introduced its latest fully-integrated, high-capacity second-generation BESS product "Quantum2" designed and optimized for global large-scale deployment.

Colombia's BESS tender in 2021, won by Canadian Solar, was a good step forward, but there is still no clear regulation on how stand-alone BESS will be compensated. Regulators are debating whether to handle storage as a ...
