Solar Energy Sales & Installation in Congo Kinshasa: We sell Felicity Solar products, Panneaux Solaire, Convertisseur, Lithium Batteries, C&#226;ble Cuivre, Dijonteur, Fusible, Lampadaire

Solar panel installations: Solar panel installations on residential roofs, offering reliable, cost-effective energy solutions. Solar home systems: Pre-packaged solar kits with lighting, telephone charging and small appliances for rural and urban households.

We sell 120 watt and 240 watt solar panels, deep-cycle batteries, cables, fuses, solar charge controllers (MPPT and PWM), and anything else needed to create an off-grid, mobile and/or backup power system.

Recharge a battery bank that is not powered by solar (i.e. RV batteries, phone batteries, etc.). Maintain the health of batteries that have not yet been installed (batteries will degrade if they are stored or sit too long between charges). Help recover batteries that have been fully drained due to improper charge parameters or lack of maintenance.

Using a solar battery can help users to reduce the amount of electricity they would normally buy during peak hours. The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate.

Depending on the electric load profile, battery technology, site configuration and other parameters, a fully installed and functional solar PV system of IZUBA will cost between 2250\$/kW and 4250\$/kW (or 2.25\$/W to 4.25\$/W), in the Democratic Republic of Congo.
