

What is Corvus Energy?

Corvus Energy is a company with unsurpassed experience from 500 projects, totaling over 400 MWh and more than 3.5 million operating hours. It also collaborates with world leader in fuel cell technology, Toyota, to develop maritime hydrogen fuel cells. For more information, please visit

Why did Toyota invest in Corvus Energy?

This investment will provide Corvus with even fuller access to Toyota's cutting-edge expertise in both fuel cells and battery technology, strengthening Corvus's ability to bring innovations to a rapidly evolving industry. Corvus Energy is the leading supplier of zero-emission solutions for maritime, offshore and port applications.

Where are Corvus fuel cells made?

In addition, Corvus Energy develops maritime fuel cells in partnership with Toyota. Corvus Energy has manufacturing and engineering in Porsgrunn, in Bergen, Norway, and in Richmond, British Columbia. In January 2023, Corvus opened a maritime battery manufacturing plant in Fairhaven, Washington.

Why should you choose Corvus Energy?

installed base of ESS solutions. This results in the segments highest performing, safest, most reliable and cost-effective product-line which includes: Corvus Orca, Corvus Dolphin Energy, Corvus Dolphin Power and Corvus Blue Whale. Milestone Achieved-- Over 10 Million Tons of CO2 emissions reduced by Corvus Energy marine battery systems.

What is Corvus ESS?

Corvus now has the largest installed base of ESS, with the largest number of projects completed in the maritime industry. Corvus ESS assists with regulatory compliance and Emission Control Area (ECA) limits while providing immediate benefits with a rapid return on investment.

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

Photo caption: The Type Approval confirms that Corvus Energy's containerized battery room has met all of DNV's stringent safety, quality, and performance standards which makes it suitable for a range of marine applications. About Corvus Energy. Corvus Energy is the leading supplier of energy storage systems for maritime, and port applications.

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring

campaign ...

Energy storage pioneer Corvus Energy is set to start development and production of sustainable, large scale maritime-certified hydrogen fuel cell systems. Production will be located in Bergen...

About Corvus Energy. Corvus Energy is the leading supplier of zero-emission solutions for maritime, offshore and port applications. Corvus Energy offers a full portfolio of energy storage and fuel cell systems, suitable for almost every vessel type, providing power systems in the form of modular lithium-ion battery systems and Hydrogen PEM fuel cell systems.

Kawasaki Heavy Industries selects Corvus Orca ESS for battery-powered propulsion system on board all-electric Asahi Tanker vessel. Bergen, Norway and Vancouver, Canada - Corvus Energy is pleased to announce that Kawasaki Heavy Industries has selected Corvus Energy to supply the energy storage system (ESS) for the first zero-emissions electric ...

Corvus Energy celebrated the grand opening of its new battery factory in Bellingham WA this week. The ceremony was held with distinguished guests such as the Governor of Washington, Jay Inslee, Norway's Ambassador to the USA, Anniken Krutnes and US representative Rick Larsen along with customers, industry partners, government agencies and ...

Corvus Energy CEO Geir Bjørkelid said: "There is an electric revolution going on in the maritime sector, and we want to deliver the best solutions in the industry. "The Corvus team in Vancouver developed the groundbreaking battery solution that accelerated adoption of zero-emission and hybrid marine propulsion systems, particularly in ...

In North America, the first all-electric tugboats are entering the market now. In Western Canada, both HaiSea Marine and SAAM Towage recently launched their respective fleets of all-electric tugboats. ... (ESS) for maritime, offshore and port applications. Corvus Energy offers a full portfolio of energy storage and fuel cell systems, suitable ...

Bergen, Norway 08.06.23 - Corvus Energy, the leading provider of zero-emission solutions for the ocean space, is thrilled to announce the launch of its ground-breaking, inherently gas-safe marine fuel cell product, the Corvus Pelican Fuel Cell System signed to transform the maritime industry, the new product represents a significant leap forward in safe, clean, and efficient ...

Corvus Energy offers a full portfolio of ESS suitable for almost every vessel type, providing high power energy storage in the form of modular lithium-ion battery systems. The purpose-built, field-proven battery systems provide sustained power to hybrid and all-electric heavy industrial equipment, including large marine propulsion drives.

Corvus Energy offers Energy Storage Systems (ESS) suitable for various vessel types, providing energy

storage in the form of modular lithium-ion battery systems. The battery systems provide power to hybrid and all-electric heavy industrial equipment, ...

In 1975, its coloniser Spain sold it to Morocco and Mauritania in exchange for continued access to Western Sahara's rich fisheries and a share of the profits from a lucrative phosphates mine.

Corvus Energy, the world leader in zero-emissions energy solutions for maritime, offshore and port applications, announced today it has secured an investment from Woven Capital, Toyota's growth fund, to accelerate the development of its growing product portfolio in battery storage and hydrogen fuel cells, and to support expansion into new ...

Corvus Energy is the world's leading supplier of safe, innovative and reliable energy storage solutions for all segments in the maritime industry. Founded in 2009, Corvus provides purpose-engineered energy storage solutions for marine, oil & gas and port applications.

Photo caption: The EU HYDRA project is part of the European Union's Horizon 2020 innovation program and aims to develop the next generation high-performance electric mobility batteries with more sustainable materials at a lower cost.. The project is coordinated by SINTEF, one of Europe's largest research organizations, and taps twelve partners across ...

Bergen, 19 January 2024 - Corvus Energy, the world leader in zero-emissions energy solutions for maritime, offshore and port applications, announced today it has secured an investment ...
