

Where is the Vatican Observatory located?

The Vatican Observatory (Italian: Specola Vaticana) is an astronomical research and educational institution supported by the Holy See. Originally based in the Roman College of Rome, the Observatory is now headquartered in Castel Gandolfo, Italy and operates a telescope at the Mount Graham International Observatory in the United States.

What is the Planetary Science Group at the Vatican Observatory?

The work of the planetary sciences group at the Vatican Observatory is primarily centered on the nature of small bodies within our own solar system and the discovery of planets around other stars. The modern study of planets as places of interest began with the pioneering work of Angelo Secchi, S.J. (1818-78) in the mid-nineteenth century.

What does the Vatican Observatory do?

Inspired by these words and the recent encouragement of Pope Francis to go to the "existential outskirts," and aware of the swift progress of our understanding of the universe, the Vatican Observatory staff strives to address the big questions of astrophysics and cosmology. We are enthusiastic about our mission.

How many scientists are in the Vatican Observatory?

Around 100 active scientists have had their names on papers connected to the Vatican Observatory. I was appointed in 2015 by Pope Francis, a true honour for a Catholic kid from Detroit, Michigan. Francis himself doesn't take an intense interest in astronomy, but Pope Pius XII was a real enthusiast.

Where is the Specola Vaticana visitor center?

AND FINALLY WE WENT OUT TO SEE THE STARS AGAIN The Vatican Museums and the Specola Vaticana, the Vatican's astronomical observatory, are pleased to announce the opening of the Specola Vaticana Visitor Center within the Papal Summer Villa Gardens in Castel Gandolfo.

What is included in a Vatican astronomy tour?

Tours will include access to two historic telescopes, a display of antique and contemporary astronomical equipment, a presentation of astronomically themed artwork, and other special exhibits. Visitors will be guided by docents knowledgeable in astronomy who have been selected and trained by the scholars of the Vatican Observatory.

SOVEREIGN THE SUPREME PONTIFF FRANCIS. Bishop of Rome, Vicar of Jesus Christ; Successor of the Prince of the Apostles, Supreme Pontiff of the Universal Church, Patriarch of the West, Primate of Italy, Archbishop and Metropolitan of the Roman Province, Sovereign of Vatican City State, Servant of the Servants of God.

Strange Adventures on Other Worlds, the Universe of the Future. The first wave of space exploration in the 20th century all but ground to a halt, the victim of national and ideological rivalries which had spent themselves, and of ...

To be published in "Astrophysics: The James Webb Space Telescope: from first light to new world views", proceedings of the Pontifical Academy of Sciences workshop February 27-29 2024, Vatican City, E.F. van Dishoeck and G. Consolmagno (eds) Subjects: Astrophysics of Galaxies (astro-ph.GA) Cite as: arXiv:2410.04227 [astro-ph.GA]

Vatican Politics: Structure and Function - Volume 26 Issue 4. 15 Catholic manuals of Dogmatic and Moral Theology employ the proposition method, setting out a thesis to be proved from the Sacred Scriptures, reason, natural law, and the opinions of theologians, as well as definitive statements of Councils and the Holy See. Even in the interpretations of ...

In retaliation to the Yeshua Mission, the Orion Group chose to invade the territories near the 5th dimensional stargate, by infiltrating this central region of Italy, in order to lay the foundation for what would become the Church of Rome, the Papacy and the Vatican City. This began the invasion of the Black Sun nonhuman entities into the region, which are the groups who ...

The Vatican City receives subsidies from the Italian state, which include the water supply free of charge, tax exemptions and other kinds of dedicated public funding. Vatican City issues its own coins and stamps. It has used the euro as its currency since 1 January 1999, owing to a special agreement with the European Union (council decision ...

Spatial variations in the cosmic electron density after reionization generate cosmic microwave background anisotropies via Thomson scattering, a process known as the "patchy screening" effect. In this paper, we propose a new estimator for the patchy screening effect that is designed to mitigate biases from the dominant foreground signals.
