

How can Cuba build a more resilient energy system?

Building a Cleaner, More Resilient Energy System in Cuba recommends numerous ways by which domestic policy in Cuba can prioritize working towards a more sustainable, resilient grid -- especially by investing in the energy transition-- and ways in which international cooperation can support these goals.

Is Cuba's energy infrastructure in a precarious state of aging and disrepair?

The report highlights the issue that not only is Cuba's energy infrastructure in a precarious state of aging and disrepair, but also that its entire energy system relies heavily on external aid and imported fossil fuels.

How will sanctions affect Cuba's electric power system?

The real impact of the sanctions on the island's Electric Power System cannot be minimized. The damage to this sector, between March 2023 and February of this year, amounted to 388,239,830 dollars, according to official estimates from Cuba.

How does US policy affect Cuba?

The lack of adequate energy generation, coupled with deteriorating energy transmission infrastructure and barriers to foreign investment due to U.S. policy toward Cuba, result in risks for Cubans and problems for everyday activities on the island, especially in conditions of severe heat.

Does Cuba still have power after Hurricane Ian?

Yes. Following the passage of Hurricane Ian in September 2022, Cuba's grid collapsed, leaving the entire country without power for several days. Authorities eventually re-established service, but not before protests broke out in various cities across the island, including Havana.

Is the United States at fault for Cuba's electricity woes?

IS THE UNITED STATES AT FAULT FOR CUBA'S ELECTRICAL WOES? Cuba has long blamed the U.S. Cold War-era trade embargo as well as more recent sanctions by former President Donald Trump for its electricity woes, allegations repeated by Cuban President Miguel Diaz-Canel on Thursday. The United States denies any role in the recent grid collapse.
