

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Which solar batteries are the most expensive?

In this article, we've included prices for both lithium-iron (LiFePO₄) and lead-acid (AGM & GEL) solar batteries. Out of the 3, LiFePO₄ batteries tend to be the most expensive - at least initially. Over time, they actually save you money because they last longer.

What is the best solar battery?

At just 3 kWh per module, the Generac PWRcell is the most flexible and customizable solar battery on our list and perhaps the market. Stack three batteries together for 9 kWh of usable capacity - ideal for Solar self-consumption and light backup - and then add up to three more per cabinet as your storage needs increase.
