

Sustainable Earth Dominica has partnered with reputable international manufacturers to bring quality solar products to the Caribbean. Based in Dominica, we offer products, installation and maintenance services.

Dominica has a very high solar potential and set a renewable energy mix target of 100% by 2035. Presently Dominica's energy mix is comprised of 37% renewable energy on the public grid. Its electrical demand peaks at 13MW and its electricity prices are high relative to ...

The solar park will generate 132,000 MWh per year and is expected to save more than 60,000 tons of CO2 emissions per year. The project helps the Dominican Republic meet their goal of generating 25% of the country's electricity consumption from renewable sources by 2025.

Yes, we strongly believe that a solar system with top quality brands is far better than a system with new or unknown brands. That's one of Sustainable Earth's main advantage. We bring the best brands to the Caribbean, and we are specialized in these.

Soco 79 MW Solar Park is installed on 84 hectares and 5 kilometers of high voltage lines, with 147,870 ASTRO modules. The solar park will generate 132,000 MWh per year and is expected to save more than 60,000 tons of CO2 emissions per year.
