Doosan Enerbility is engaged in numerous power generation projects, including combined cycle power plant and wind farm projects, and we are involved in all the various stages of plant EPC projects, from project development to the design & engineering, equipment supply and construction work.

Doosan Enerbility will contribute to the project by assembling the nacelles, a crucial wind turbine component, at its Changwon wind turbine shop. Doosan Enerbility founded its offshore wind business in 2005 and offers a diverse product portfolio with models ranging from 3.3MW to 8MW. It is the only entity in Korea supplying offshore wind turbines.

Since 2013, Doosan Enerbility has been publishing the company's Integrated Report annually, disclosing its financial and non-financial performance, as part of its efforts to provide stakeholders with information in a transparent manner. Click to view the Integrated Report. ??? Reports ...
