A decimated network. Syria was once a power hub, producing enough power not just for domestic use but also for exportation. This was thanks to a network of 15 power plants, including the Aleppo thermal power plant

and three hydropower dams; however, since the outbreak of war, \$5bn worth of infrastructure has been destroyed or damaged.

The 120W EFlex portable solar panel is suitable for the new Phoenix 500/1000 power station and most solar generators on the market with the MC4 connector cable. The portable solar panel adopts PERC solar cell ...

The 120W EFlex portable solar panel is suitable for the new Phoenix 500/1000 power station and most solar generators on the market with the MC4 connector cable. The portable solar panel adopts PERC solar cell technology with a conversion efficiency of up to 22%. The ETFE-laminated case and IP65 water-resistant rating provide ultra protection ...

In 2010, Syria generated almost 44 billion kilowatt-hours of electricity, 94% of which came from conventional thermal power plants and the remaining 6% from hydroelectric power plants. By early 2013, more than 30 of Syria's power stations were inactive, reflecting generation capacity losses upwards of 20%.
