

During 2023, El Salvador's photovoltaic plants generated around 539,067.71 MWh, which represented 7.13 % of the energy matrix, assured the DGEHM. The energy sector in El Salvador has experienced significant growth in recent years, positioning the country as a regional leader in the transition to renewable, cleaner, and more sustainable sources.

The estimated investment in these photovoltaic parks amounts to \$152.6 million, according to data from the Ministry of Housing. Between 2015 and 2023, El Salvador experienced a 160-fold increase in its solar energy generation capacity, according to statistics from the Latin American Energy Organization (Olade). This increase is the result of a greater ...

B#243;sforo comprises 10 plants of 10 MW each, for a total capacity of 100 MW of energy produced by solar photovoltaic sources, contributing to prevent emissions of more than 175 thousand metric tons of CO2 per year. The investment in the project was of ...

The Salvadoran Government, under President Nayib Bukele, is advancing the construction of Talnique Solar, the country's first state-owned solar power plant. Anticipated to start operations by the end of 2023, it will supply renewable energy to roughly 25,000 households.

Located in the tropical region of Central America, San Salvador, El Salvador (13.6806 latitude and -89.1803 longitude) enjoys a considerable amount of sunlight throughout the year, making it an excellent spot for solar photovoltaic (PV) energy generation. The city's distinct wet and dry seasons play a significant role in solar power production.

In a move towards sustainable energy, the Executive Hydroelectric Commission of the Lempa River (CEL) recently inaugurated «Talnique Solar,» El Salvador's first state-owned photovoltaic plant. This initiative, planned, constructed, and operated by CEL's subsidiary, Inversiones Energéticas (INE), signals a significant step in the country ...
