

Investors have until June 12 to apply for grants for energy storage investments in Bulgaria of EUR 273 million within two calls. The subsidies are for battery systems required ...

The Bulgarian government considers the latest battery storage tender as part of its larger efforts to increase the share of renewable energy generation, especially wind and solar, in the country's energy mix and ensure seamless integration of ...

The Plan designates a sum amounting to 878 mln. lev for cofunding solar projects, including auxiliary battery storage. The goal is to increase the country's energy capacity by at least 1.4 GW. The funding is ...

The Plan designates a sum amounting to 878 mln. lev for cofunding solar projects, including auxiliary battery storage. The goal is to increase the country's energy capacity by at least 1.4 GW. The funding is aimed mostly at offsetting battery costs.

A 300MW/600MWh battery energy storage system (BESS) developed by Ørsted will be co-located with its Hornsea 3 Offshore Wind Farm onshore substation. Flow battery player Invinity claims new product can enable "solar baseload" for the grid

Bulgaria's battery storage market gears up Bulgaria has installed between 40 MWh and 50 MWh battery energy storage capacity to date. However, a new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility could see the country install another 1 GWh over the next two years.

The Bulgaria's Ministry of Energy began accepting applications yesterday (21 August) in tenders for 3,000MWh of energy storage capacity. Called the National infrastructure for the storage of electricity from renewable sources (RESTORE), the programme seeks battery energy storage system (BESS) resources that will go into operation by March 2026.

A strong battery segment requires a good manufacturing base. Belgian company ABEE launched a EUR 1.1 billion project a year ago for a battery plant, recycling facility and a research and development center in Bulgaria. Solar MD, a battery manufacturer based in South Africa, opened its LiFePO4 Energy Storage manufacturing facility in Rousse last ...

The Bulgaria's Ministry of Energy began accepting applications yesterday (21 August) in tenders for 3,000MWh of energy storage capacity. Called the National infrastructure for the storage of electricity from renewable ...

Currently, Bulgaria's electricity market offers an opportunity for EUR110 (\$122) per MWh profit on battery energy storage with two hours of discharge capacity using energy arbitrage. Rystad Energy's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh.

Bulgaria Frames Applications for Mega Battery Storage. The Bulgarian Minister of Energy opened the bidding to supply bulk energy storage on 21 August, 2024. He called for tenders for 3,000 megawatts of bulk energy storage, that could be up and running by March 2026. Energy Storage news explains how this fits in the overall project to foster ...

Investors have until June 12 to apply for grants for energy storage investments in Bulgaria of EUR 273 million within two calls. The subsidies are for battery systems required to be installed together with renewable electricity plants of at least 200 kW in capacity.
