Auto-Call Modem Requirements If not powered by the cabinet's 220 VAC power, the North American Auto-Call modem requires connection to a 110 VAC power source at 60 Hz through a NEMA 5-15R receptacle. International installations are country-specific. \*Note: Standard power is single phase; three-phase options available.

EMC Centera(TM) Content Addressed Storage is a purpose-built, hardware and software disk-based storage product that fulfills the challenge of securely holding hundreds of terabytes of business content online for months, years, or decades. Centera complements EMC's traditional
