In response, a crisis team meeting was urgently convened with representatives from the Netherlands, Curacao, Aruba, and St. Maarten. Initially, we believed we could secure sufficient mobile generators from our sister islands.

Electricity in Sint Maarten - voltage and frequency. All power sockets in Sint Maarten provide a standard voltage of 110V with a standard frequency of 60Hz. You can use all your equipment in Sint Maarten if the outlet voltage in your own country is between 100V-127V. This is mostly the case in the US, Canada and countries in South America.

This initiative, supported by the ongoing "Emergency Recovery Project 1" of the Sint Maarten Trust Fund, aims to elevate NV GEBE's business and investment strategies, ensuring the delivery of reliable power across Sint Maarten.

Fellow Sint Maarteners, This is Patrice Gumbs, your Minister of VROMI addressing you in my capacity as Deputy Prime Minister. A few moments ago, GEBE informed me that we are experiencing an island-wide blackout. All efforts are being made to restore power, which will be followed by a swift assessment of the situation.
