

What are enepaq battery modules?

Enepaq Battery Modules are a unique blend of latest battery technology, safety and ease of use. Each Battery Module is made of several 3.6V 18650 Li-ion cells connected in parallel. Several such blocks may be connected in parallel and series to form high voltage Battery Packs of various shapes and sizes.

What is enepaq technology?

Enepaq technology allows us to build a battery module from 1s1p to 1s20p with 18650 size cells. Each block comes with various options: Enepaq Battery Modules combine the best of two worlds - Low Weight, High Power, Quality, Safety UN38.3 certified, and Ease of Use.

What are enepaq batteries made of?

Each block is made of several 3.6V 18650 Li-ion cells connected in parallel. Several such blocks may be connected in parallel and series to form high voltage battery packs of various shapes and sizes. Enepaq technology allows us to build a battery module from 1s1p to 1s20p with 18650 size cells. Each block comes with various options:

What is enepaq VTC6?

ENEPAQ - Model VTC6 - Sony/Murata ... Battery Module from Enepaq combine the best of two worlds - Low Weight, High Power, Quality, Safety and Ease of Use. Enepaq Battery Modules are a unique blend of latest battery technology, safety and ease of use. Each Battery Module is made of several 3.6V 18650 Li-ion cells connected in parallel.

What products does enepaq offer?

Standard products include lithium-ion building blocks and feature-rich Battery Management Systems. Since last year's sponsorship program was a great success, Enepaq is proud to announce our new joint sponsorship with Tesla Inc., for the second year in a row. Participating e-formula teams will receive a discount of EUR5000 on their order from Enepaq.

What is enepaq's partnership with Tesla?

Manufacturer of lightest and simplest lithium batteries for short time to market. Standard products include lithium-ion building blocks and feature-rich Battery Management Systems. Since last year's sponsorship program was a great success, Enepaq is proud to announce our new joint sponsorship with Tesla Inc., for the second year in a row.

Battery Module from Enepaq combine the best of two worlds - Low Weight, High Power, Quality, Safety and Ease of Use. Enepaq Battery Modules are a unique blend of latest battery technology, safety and ease of use. Each Battery Module is made of several 3.6V 18650 Li-ion cells connected in parallel.

Enepaq Li-ion Battery Modules from 18650 and 21700 cells combine the latest battery technology with safety and ease of use designed for effortless battery pack assembly. Each module is ...

ENEPAQ's battery modules, made from 18650 and 21700 cells, offer a unique blend of the latest technology, safety, and ease of use. Our modules are recognized globally, especially in the FSAE community, for their quality and reliability. Key features of our battery modules include: UN 38.3; Integrated temperature sensors for easy monitoring

**Battery Modules:** We offer a wide range of modular battery solutions based on 18650 and 21700 lithium-ion cells. These modules are designed for easy integration and scalability, allowing you to build battery packs of various sizes and configurations. Key features include: High energy density: Maximize power output while minimizing weight and volume.

**ENEPAQ Battery Packs** A battery pack is a set of any number of battery cells connected and bound together to form a single unit with a specific configuration and dimensions. They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or ...

**BMS, or Battery Management System,** is an essential component of every Lithium battery. Enepaq Tiny BMS supports lithium batteries of any chemistry and up to 60 V nominal. Battery capacity from sub-1 Ah to 655 Ah can be managed easily. Tiny BMS measures individual voltages of parallel cell groups and manages switching of load and charger.

Enepaq Li-ion Battery Modules from 18650 and 21700 cells combine the latest battery technology with safety and ease of use designed for effortless battery pack assembly. Each module is constructed from multiple 3.6V 18650 and ...

We offer ultra safe and modern modules made from time-proven and industry standard 18650 cells, and modular, highly configurable, universal BMS for quick battery deployment. Our main value is that we will save you months of R& D!

Enepaq Li-ion Battery Modules from 18650 and 21700 cells combine the latest battery technology with safety and ease of use designed for effortless battery pack assembly. Each module is constructed from multiple 3.6V 18650 and 21700 Li-ion cells connected in parallel.

ENEPAQ's battery modules, made from 18650 and 21700 cells, offer a unique blend of the latest technology, safety, and ease of use. Our modules are recognized globally, especially in the FSAE community, for their quality and ...
