

Since 2015 the conference and expo SEF has become one of the leading Central Europe's events dedicated to advanced solutions in the field of PV, energy storage, smart usage of distributed RES and green mobility. In 2022 over 3 300 visitors from Czech Republic, Slovakia and Germany took part in SEF.

Legislation does not incentive the Development of Energy Storage in Slovakia. In case of using ES product in practice, ex. providing Ancillary Services it is necessary to supplement the regulatory policy, define the concept of storage in the Energy Act, supplement the ...

ENGIE's first battery storage system in Slovakia, utilizing Pixii's PowerShaper technology, began operations in January 2024. This BESS is integral to ENGIE's multi-phase project, enhancing grid stability, supporting renewable energy integration, and laying the groundwork for future energy flexibility services in Slovakia.

Wattstor and ENERGE are proud to announce their collaborative deployment of battery storage for ancillary services in Slovakia. Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh ...

We've designed and manufactured an entirely new line of energy storage products to meet the needs of grid energy storage, deployment, operation, and energy management for the next 20 years. Every detail in our AESI products makes them fundamentally easier to purchase, install, maintain and operate than any other energy storage alternative ...

We've designed and manufactured an entirely new line of energy storage products to meet the needs of grid energy storage, deployment, operation, and energy management for the next 20 years. Every detail in our AESI products ...

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary frequency regulation (FCR) in the V4 countries. This collaboration marks a significant milestone in enhancing grid stability and integrating renewable energy sources in Slovakia.

In a landmark achievement, Wattstor and ENERGE have successfully implemented a cutting-edge 1.5 MW / 1.6 MWh Battery Energy Storage System (BESS) for ancillary services in Slovakia, enhancing the country's grid stability and fostering innovation.

Wattstor and ENERGE are proud to announce their collaborative deployment of battery storage for ancillary services in Slovakia. Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh battery energy storage system (BESS), the first of many projects planned for

deployment in 2024.

The exhibition covers all areas of the photovoltaic, wind power and energy storage industries, including equipment technology, engineering materials, system solutions, application products, ...

As Slovakia strides towards modernizing its energy infrastructure, Greenbat and Pixii have joined forces to pioneer the first battery storage system certified for primary ...

The exhibition covers all areas of the photovoltaic, wind power and energy storage industries, including equipment technology, engineering materials, system solutions, application products, supporting facilities, and various other related industries.
