There are two other potential costs you should look into before installing solar panels, these are maintenance costs and repair costs.

How much does a solar battery cost in the UK?

Currently, solar battery prices in the UK cost anywhere between £2,500 and £10,000 depending on the battery capacity, type of battery and lifespan. A typical 5 kilowatt hour (kWh) solar battery, suitable for a three-bedroom house, costs £5,000, on average.

Should I add a solar battery storage system?

The greater the capacity of your battery, the more electricity it can store, though this will naturally come with a higher price tag. Adding a solar battery storage system will of course increase your overall solar panel investment but you will gain by using on average an extra 30% of the solar energy your panels generate to power your home.

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2024, the price of solar panels in the UK can vary depending on several factors.

Do solar panels have battery storage?

Battery storage lets you bank electricity generated by your solar panels until you need it. But batteries are expensive so it will take longer for your system to pay for itself. Find out more about solar panels and battery storage. The cost of a battery is not included in the prices above.
