The Renewable Energy Partnership is a partnership between Novo Holdings, Sampension and European Energy with the intention to buy land for the construction of solar and wind farms in Denmark and Sweden.

In recent years, Denmark has gained considerable international attention as one of the first movers in implementing a green energy transition - the so-called grøn omstilling. In order to achieve an energy system independent from fossil fuels by 2050, Denmark is pursuing an integrated policy approach that takes all energy sectors into account.

As the global energy landscape evolves, financial investors and corporates are navigating the complexities of the energy transition. This transformation offers significant investment opportunities, driven by the need to enhance energy efficiency, expand renewable energy capacity, and modernize infrastructure.
