

Who is EOS Energy Enterprises?

Since our founding in 2008, Eos Energy Enterprises has been on a mission to accelerate the shift to clean energy with positively ingenious solutions that transform how the world stores power. Our breakthrough Znyth® aqueous zinc battery was designed to overcome the limitations of conventional lithium-ion technology.

What does Eos do?

At Eos, we are building the future of energy storage--scaling safe, sustainable solutions to meet the world's growing demand for clean energy. As Chief Integrated Supply Chain Officer, Brian leads and oversees company-wide Manufacturing Operations, Supply Chain, Safety and Quality.

Why is Eos building a new energy storage facility?

Eos expects the new facility to generate hundreds of new jobs, contribute to local economic development and strengthen the nation's energy security and independence. Eos' zinc-based technology offers a safe, secure, and cost-effective solution to these energy storage challenges.

What makes EOS a good battery?

Safe, simple, durable, flexible, and available, our commercially-proven, U.S.-manufactured battery technology overcomes the limitations of conventional lithium-ion in 3- to 12- hour intraday applications. It's how, at Eos, we're putting American ingenuity to work every day to create a positive future for everyone.

How much power does EOS produce a year?

Eos currently operates a semi-automated factory in Pennsylvania with a maximum production of about 540 megawatt-hours annually (if those were lithium-ion batteries, it would be enough to power about 7,000 average US electric vehicles), though the facility doesn't currently produce at its full capacity.

What to expect at EOS Energy Booth n97049?

For those attending, be sure to visit the Eos Energy booth (N97049) to meet the Eos team! Our onsite team will be ready to discuss how our Z3(TM) solution can meet your energy storage needs. Our U.S.-manufactured zinc-based technology offers a safe and sustainable alternative to incumbent technologies.

2 ???· Eos Energy Enterprises, Inc. (NASDAQ: EOSE) ("Eos" or the "Company"), America's leading innovator in the design, sourcing, and manufacturing of zinc-based long duration energy storage (LDES) systems, manufactured in the United States, and FlexGen Power Systems ("FlexGen"), announced they have signed a Joint Development Agreement (JDA) to develop ...
