

How many kilowatts can a EP Cube store?

The EP Cube energy storage system can store up to 19.9 kilowatt-hours of energy, comes with an integrated inverter, and can be installed with or without solar. Let's take a closer look at everything Canadian Solar's EP Cube has to offer.

Does EP Cube Lite provide backup power?

The EP Cube Lite was designed with California's Net Billing policy in mind. Although it can't provide backup power, it can help combat time of use pricing and low solar buyback rates, saving homeowners more money. If having access to energy during a power outage is your main concern, opt for the EP Cube instead. How much does the EP Cube cost?

What is a EP Cube Lite?

The EP Cube's modular design is a huge draw, as you can customize the size based on your energy needs. The 6.6 kWh capacity EP Cube Lite is great for homeowners who just want to avoid time-of-use rates, while the 19.9 kWh EP Cube can keep key appliances running throughout a prolonged power outage.

Can the EP Cube Lite be upgraded to an EP Cube system?

The EP Cube Lite can be upgraded to an EP Cube system in the future. Because the EP Cube Lite is smaller, it has less wiring and requires a smaller installation crew, meaning it costs less. Canadian Solar claims it can be installed in 20 minutes or less.

What is EP Cube used for?
