

What is EPR compliance for battery waste?

In this blog, we will explore the concept of EPR compliance for battery waste and its significance in creating a sustainable future. Extended Producer Responsibility (EPR) is a policy approach that holds producers or manufacturers accountable for the entire lifecycle of their products, including their end-of-life disposal.

What is Extended Producer Responsibility (EPR) compliance for battery waste?

In conclusion, Extended Producer Responsibility (EPR) compliance for battery waste is crucial for businesses aiming to create a sustainable future. It ensures the proper collection, recycling, and safe disposal of batteries, preventing environmental contamination and conserving valuable resources.

What is Extended Producer Responsibility (EPR)?

Targets for Extended Producer Responsibility (EPR) o Producers shall meet their EPR obligation through EPR certificates provided by the recyclers/ refurbishers on the CPCB's online portal. o There are year wise EPR targets as well as cumulative EPR target for the given compliance cycle. These targets are different for different type of batteries.

To ensure that batteries placed in the EU market are sustainable and safe throughout their entire life cycle, the EU battery directive is in place. Pincvision takes over all required reporting obligations from your organization.

Battery Waste Management (BWM) Rules, 2022 have been notified by Ministry of Environment, Forest and Climate Change on 22 Aug., 2022. These rules are applicable to all types of batteries regardless of chemistry, shape, volume, weight, material composition and use.

As a responsible business owner, it is crucial to understand and comply with Extended Producer Responsibility (EPR) regulations for battery waste management. In this blog, we will explore the concept of EPR compliance for battery waste and its significance in creating a sustainable future.

In this article, through case studies, we explain the method to calculate the Extended Producer Responsibility (EPR) targets for Producers under the Battery Waste (Management) Rules, 2022. 1. Type of Batteries Covered Under EPR

Reliable & Innovative Battery Solutions EMCOR Authorized agent for Powersonic USA and Siel Italy comprising of products like UPS and batteries, we ensure Power protection at all times and maintenance supports on finger tips.

Karo Sambhav offers sustainable battery waste recycling measures and turnkey services conforming to technical standards and stringent EPR regulations. The organisation collects, segregates, dismantles, and

refurbishes batteries to create a circular economy.
