

Could Samoa's electricity system Go Green?

The future of Samoa's electricity system could go green, a University of Otago study has shown. Pacific Island nations are particularly susceptible to climate change and face high costs and energy security issues from imported fossil fuels. For these reasons many Pacific Island nations have developed ambitious 100 per cent renewable energy targets.

Does Samoa need a hydro power plant?

Two small hydro projects constructed in Samoa have increased electricity supply and helped boost hydro capacity to meet a goal of supplying 20% of the total demand of the islands via hydropower. By Andrew Bird and Alfred Matatia Halfway between Hawaii and New Zealand in the vast Pacific Ocean rests the island nation of Samoa.

Does Samoa have a powerhouse?

The powerhouse contains a four-jet vertical Pelton turbine. Traditionally, the baseload for Samoa is provided by diesel power stations, with hydropower stations used as peaking stations to cater for the diurnal peak loads. Consequently, they continue to average capacity factors of no more than 35% due to lack of storage.

What are the new small hydro projects in Samoa?

This article focuses on the new 600-kW Fausaga-Tafitoala and 200-kW Faleata small hydro projects, which were commissioned and dedicated to the people of Samoa at the beginning of 2019. Until recently, Samoa's major form of electricity production was diesel generation.

Please be aware that delivery of the handmade Home Stands are 6 weeks out due to increased demand. If you order a LightTower with the Stand, we will ship the LightTower ahead of the Stand.
