

Frazium Energy - part of the Australian-German Frazer Solar group - has signed a 40-year contract with the government of the Southern African kingdom of Eswatini (formerly known as Swaziland ...

The Eswatini Energy Regulatory Authority (ESERA) has released a request for an expression of interest (EOI) for the design, construction, operation and maintenance of the Bulimeni Solar PV-Battery Mini-grids System.

The contract allows FZM to operate the large scale solar-storage IPP project in Eswatini for 40 years. In return, FZM will invest \$116.5 million over the next five years for the first phase of the project. The photovoltaic (PV) park will be coupled with battery storage capacity and FZM estimates it will require an investment of \$115 million.

Frazium Energy - part of the Australian-German Frazer Solar group - has signed a 40-year contract with the government of the Southern African kingdom of Eswatini (formerly known as Swaziland) for a EUR100 million (\$115 million) solar battery project.

The Sigcineni Off-Grid Solution project began as a small-scale off-grid pilot study into the use of solar technology to meet rural electrification objectives. This project includes a 200kWh battery energy storage system and is one of several ongoing projects by the Eswatini Electricity Company to improve the country's electricity access rates.

Frazer Solar, an Australian-German company, has signed a definitive deal with the Government of Eswatini (Swaziland) for a 100MW solar battery project, which will be Africa's largest. With a capacity of 100MW, the EUR100 million Mega Solar-Storage project will be built at the Edwaleni power station in Matsapha, Eswatini.

Frazium Energy has signed a contract with the Eswatini government to develop a solar PV and storage project. The first phase is expected to consist of a 25-30MW solar PV component with a 100MW lithium-ion battery, supplying about 100GWh/yr at a cost of \$115m, according to chief executive Robert Frazer.
