

Are Spain & Portugal ready for a green energy transition?

Spain and Portugal's unique geographic endowments--including ample opportunities for cost-effective renewable energy production and significant raw materials--as well as their mature industrial base, mean they are well placed to capture the "green growth" that the energy transition can deliver.

Are Spain & Portugal a good place to invest in green energy?

Spain and Portugal, with their unique geographical position and mature industrial base, possess natural endowments that could position them as frontrunners in clean energy production and allow them to capitalize on green opportunities.

Are green steel and green ammonia a potential target for Spain & Portugal?

Green steel and green ammonia are two examples of industries that rely on green hydrogen in their processes, making them potential targets where Spain and Portugal could leverage their access to lower-cost green hydrogen and their mature industry base (see sidebar "Green steel and ammonia").

Can the Iberian Peninsula lead the energy transition?

With natural resources and mature industrial infrastructure, the Iberian Peninsula has an unprecedented opportunity to lead the energy transition.

Can Spain and Portugal produce green steel?

Despite collectively being the third-largest producer of steel in Europe, Spain and Portugal's opportunity in green steel lies in producing a green steel intermediate, direct reduced iron (DRI), through the hydrogen-consuming H-DRI-EAF method. European steel in figures 2022, Eurofer, 2022.

Should Spain & Portugal be a shaper of green industrial growth?

Spain and Portugal now have a choice: stay the course and see their competitive advantage eroded--or seize this opportunity to become prominent shapers of green industrial growth in Europe.

Eternal Energy | 555 seguidores en LinkedIn. ¿Liderando el sector de la Energía? El mundo mejor gracias a la Energía Solar y el Autoconsumo. | Eternal Energy es una empresa española dedicada a la producción y comercialización de energía renovable. Nuestro enfoque principal es la energía solar y ofrecemos soluciones integrales para la instalación de paneles ...

Coal generation has collapsed over the last two decades, declining from 36% of Spain's electricity in 2000 to less than 2% in 2023. The largest fall in 2023 was in Spain's gas generation, down 27% year-on-year. Spain's largest source of clean electricity was wind (24%), while solar accounted for 17% of total electricity generation.

The green energy required for splitting water into green hydrogen and oxygen will be generated by 40MW of new solar PV capacity. This will result in almost 1,000 tons of green hydrogen per year. ... initiatives to start building its global renewable energy pipeline with a focus on solar projects in Germany as well as Spain, Italy, Turkey, UAE ...

Eternum Energy | 452 seguidores en LinkedIn. We believe a low-carbon economy will happen sooner, rather than later. | Eternum Energy is a renewable energy consulting and advisory company.
