

What is the EU state aid scheme for energy storage in Italy?

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy.

What is the EU energy storage programme?

It will be led by transmission system operator (TSO) Terna. The EU approved a EUR17.7 billion package to fund the programme in December 2023, and Terna is aiming for it to support the deployment of 50GWh of energy storage by 2030, which is lower than the initial 71GWh forecast.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

What does the European Commission say about energy storage?

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a Staff Working Document, providing an outlook of the EU's current regulatory, market, and financing framework for storage and identifies barriers, opportunities and best practices for its development and deployment.

How does EU state aid affect storage facilities?

The aid has an incentive effect, as the supported storage facilities would not be financially viable without the public support. The aid brings about positive effects which outweigh any potential distortion competition and trade in the EU. On this basis, the Commission approved the Italian scheme under EU State aid rules.

When will energy storage capacity auction start in Italy?

The energy minister of Italy has signed a decree paving the way for an energy storage capacity auction to kick off in the first half of 2025.

As Europe accelerates its energy transition, energy storage is emerging as a critical piece of the puzzle. Through a series of interviews, we will explore energy storage business cases from across the EU, demonstrating that these projects are viable, profitable and essential to achieving Europe's energy security and climate goals. These success stories ...

In the first half of 2023 alone, an additional 6.3GWh of installations were made, equivalent to eight months' worth of installations in Europe's residential energy storage systems (ESS) markets. The inventory has now

stabilized at a normal level. In 2023, the residential ESS market in Europe reached approximately 9.5GWh.

The Energy Storage Global Conference 2024 (ESGC), organised in Brussels by EASE - The European Association for Storage of Energy, as a hybrid event, on 15 - 17 October, gathered over 400 energy storage stakeholders and covered ...

In December 2023, the EU greenlit Italy's energy storage program, earmarking a hefty investment of EUR17.7 billion. This initiative is anticipated to facilitate the construction of over 9GW/71GWh of energy storage systems (ESS). The program is slated to run until the conclusion of 2033, with strategic plans in place for the establishment of ...

The European Commission has approved, under the European Union's state aid rules, a EUR 17.7 billion scheme with which Italy intends to support the establishment and operation of a centralized electricity storage system.

The Energy Storage Coalition, brought together by prominent European trade groups for solar, energy storage and wind, together with Breakthrough Institute, assesses that four countries are conducting flexibility assessments (Hungary, Italy, Luxemburg and Portugal), while Greece, Malta and Spain have developed comprehensive strategies on energy ...

Italy Energy Wire is an online news publication focusing on energy in ... Sungrow Sets the Vision for the Future of Energy Storage in Italy. ... gathering over 200 esteemed participants from across Italy's and Europe's energy landscape. The event that took place in an area which in the past was ... Italgas to distribute gas in La Spezia area ...

Within Southern Europe, Italy is already the leading market for large-scale energy storage systems, ... Another noteworthy element where energy storage can improve Italy's energy system is by backing up the power storage role that hydroelectric plants have been playing. Around 16 percent of Italy's installed power capacity comes from ...

The energy storage market in Italy doubled in capacity in the first half of the year, though Q2 saw the first slowdown in nine quarters and that could be repeated in H2, according to the country's renewable energy trade body. ... The deadline has now passed for Bulgaria's EU-backed support scheme for standalone energy storage, and the bids ...

EASE and LCP-Delta are pleased to announce the publication of the eighth edition of the European Market Monitor on Energy Storage (EMMES). The Market Monitor is an interactive database that tracks over 3,000 energy storage projects. With information on assets in over 29 countries, it is the largest and most detailed archive of European storage. The database is ...

It addresses the most important issues contributing to the broader deployment of energy storage. EU countries

should consider the double "consumer-producer" role of storage by applying the EU electricity regulatory framework and by removing barriers, including avoiding double taxation and facilitating smooth permitting procedures. ...

The Italy-headquartered startup has developed a so-called CO₂ Battery thermo-mechanical storage device in which carbon dioxide (CO₂) is adiabatically compressed and then liquefied to charge with energy, then evaporated to dispatch it. ... Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London ...

As the leading energy storage market in Europe, Germany's efforts constituted around 34% of Europe's total installed energy storage capacity in 2022. In May 2022, the EU unveiled the "REPowerEU" energy plan, aiming to elevate the renewable energy target to 45% by 2030, with an interim goal of 42.5% in the 2023 agreement.

Novel Thermal Energy Storage in the European Union STATUS REPORT ON TECHNOLOGY DEVELOPMENT, TRENDS, VALUE CHAINS & MARKETS ISSN 1831-9424 CLEAN ENERGY TECHNOLOGY OBSERVATORY. This publication is a Technical report by the Joint Research Centre JRC, the European Commission's science and knowledge service. It aims

Italy, Germany, Spain, France and Ireland expected to be the leading EU countries for storage deployment between now and 2031; Tamarindo's Energy Storage Report brings you a country-by-country run-down of the key players driving innovation in the major European storage markets; The UK is forecast to be the European country that will add the ...

Accelerate your energy storage journey at the 10th anniversary Energy Storage Summit in London. With Europe's storage capacity booming, join 2000+ industry leaders to explore key challenges and opportunities. Secure your spot now! ... Italy, Germany, Poland, and the Nordics, among others. Of the 5 GW currently under construction in Great ...
