As well as a solar energy pilot scheme at Sand Bay, there are plans to retrofit existing housing stock with more energy efficient measures. The department is recording data from the new houses to see which energy systems will work best in older properties.

This has meant that 90% of households in Camp use energy derived from wind and solar power, while 35% of Stanley's energy comes from wind power, mainly three eolic turbines at Sand Bay.

Sunrun installed solar panels on the apartment rooftops, providing tenants with 117 kilowatts of solar power. The solar system generates enough energy to offset nearly two-thirds of tenants' energy usage, saving each household about \$35 per ...
