

Could Brunei be the future of natural gas?

Brunei is currently the largest per capita emitter in the region. But its wealth of natural gas represents a path to the future: hydrogen. It is already being exported to Japan. What else could be possible? Brunei's energy footprint is not exactly stellar. It is a small country on the island of Borneo with just 400,000 inhabitants.

Does Brunei have a green energy plan?

The country has not readily adopted green energies. Brunei intends to increase sustainable energy generation, yet, only 0.05 percent of the power generated came from renewable sources in 2020. The government hopes to meet 30 percent of its overall power generation mix with renewable energy by 2035.

Is Brunei dependent on fossil fuels?

Brunei is dependent on fossil fuels. This has consequences. Brunei's energy sector is currently Southeast Asia's largest per capita emitter of CO₂: The country meets nearly 99 percent of its need for electricity with natural gas, and the rest with oil. The green energy from its single solar power plant meets 0.05 percent of its supply.

Will Brunei develop offshore wind capacity?

However, while it has been suggested that Brunei will develop offshore wind capacity, this is yet to happen. The country has not readily adopted green energies. Brunei intends to increase sustainable energy generation, yet, only 0.05 percent of the power generated came from renewable sources in 2020.

What role does Brunei play in the global oil and gas market?

As a key player in the global oil and gas market, Brunei holds a crucial role in exporting gas and liquefied natural gas (LNG), he said. To ensure a sustainable and environmentally responsible approach, it is imperative for the nation to prioritise the adoption of CCUS technologies in its gas and LNG production processes.

What is the Brunei energy industry integrity pact (BEIIP)?

Established in 2017, the Brunei Energy Industry Integrity Pact (BEIIP) represents the energy industry's commitment in upholding business integrity and fight against any form of corruption. This is delivered through 10 essential principles which the signatory companies shall incorporate into their ways of working.
