BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD., a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery) *1. The new product NAS MODEL L24 has been jointly developed by NGK and BASF and is characterised by a significantly lower ...

EnerG2 and BASF announce far-reaching strategic partnership. Energy storage materials pioneer and the world's leading chemical company enter into multifaceted collaboration to extend global presence for advanced carbon ...

"With the NAS MODEL L24 our customers will be able to reduce their initial investment in battery storage system as well as save on long-term project costs, approximately 20% over project lifetime," Frank Prechtel, managing director of BASF Stationary Energy Storage said. Read more [Energy-Storage.news](#) coverage of the NAS Battery.

As reported by [Energy-Storage.news](#) as Round 1 opened in April, proposals must include at least five battery storage systems each, with systems that share a grid connection counted as one project. The programme is being paid for with money allocated from the federal government's Household Solar Budget. In total, AU\$171 million from a total pot of AU\$200 ...

The facility, located in Schwarzheide, Germany, is the first production facility for lithium-ion cathode active materials in Germany and the first fully automated large-scale one in Europe, BASF said. A spokesperson told Energy-Storage.news that the production facility is now undergoing commissioning, while the recycling operations will come later.

Long-duration battery energy storage system on a sodium-sulphur basis (NAS ® battery) optimises energy use and stabilises power supply from renewable energy sources.; As the first BASF production site worldwide, Schwarzheide is piloting green power supply for individual production parts through the combination of its own solar park and a stationary ...
