

The Guam Power Authority is investing in almost \$50 million total for a battery storage system with a 25-year maintenance contract to help alleviate intermittent frequency from renewable...

Micronesia Renewable Energy, Inc., the exclusive partner and certified installer of TESLA Powerwall energy storage systems on Guam and the CNMI, have been installing these battery storage systems in homes throughout the island.

We offer home solar and battery storage across Guam protected by our leading 25-year warranty. Learn more about GU home solar panels, incentives, cost, tax credits, rebates, frequently asked questions, and savings.

Operational since March 2021, GPA's world-class utility-scale battery energy storage system (BESS) has assisted in eliminating most of the short-duration power outages caused by generator and renewable intermittency trips. The system works to smooth out the fluctuating solar output and monitor the frequency, reacting accordingly to stabilize the

When a battery storage system is added, these systems deliver reliable and efficient energy to the grid with minimal voltage fluctuations. Batteries that use Ni-Cd (Nickel-Cadmium), Ni-MH (nickel-metal hydrate), and Li-ion (Lithium-ion) deliver a high performance, long service life and low to zero maintenance.

Introducing Solar + Battery Storage! Generation Renewable - Guam and Sunnova are now offering Solar Energy Systems with Battery Storage Systems. This means that your back up panel board in your home will have power even when utility power isn't available, like during power outages or during and after a storm.
