

Why is the energy sector important in Guyana?

The energy sector, the Prime Minister explained, is the lifeblood of any nation's development. "It is the bedrock upon which our economic prosperity, social progress, and wellbeing of our people depend." He said that tremendous improvement has been made by the Guyana Power and Light (GPL) since the current administration took office.

Does Guyana have a potential for hydropower?

Guyana has significant potential for hydropower, like its neighbor Suriname which has successfully developed hydro power programs. Renewable energy is viewed as a potential solution by the GoG to reduce the cost of power and provide reliable electricity.

What does the Guyana Energy Agency do?

The Guyana Energy Agency is responsible for overseeing feasibility studies for the integration of renewable energy programs in Guyana and has regulatory oversight over certain aspects of the energy industry, in addition to the Ministry of Public Works.

How will Guyana contribute to greener energy use?

This, he noted, will contribute to cleaner and greener energy use across the nation within the decade. By 2030, Guyana aims to produce 500 MW of electricity by embracing an energy mix composed predominantly of clean energy sources. Doing so would accommodate the growing demand for electricity while remaining environmentally conscious.

Why was the energy mixer held in Guyana?

The Energy Mixer was held under the theme "Delivering the Energy Benefits: The Transmission and Distribution System". Prime Minister Brigadier (Ret'd), the Honourable Mark Phillips, who is responsible for Guyana's energy sector, outlined the Government's plans to transform the nation's power infrastructure to meet its growing needs.

Does Guyana's power grid need to be modernized?

Guyana's power grid is in a severe state of disrepair and needs to be modernized. Approximately 26 percent of the power generated by GPL is lost due to inefficiencies in the grid.
